A well-publicated frex' report projects that by 2003, "smart automation" featured pages and incombine up to 18 Ker global GOP lareand 3DN to UK GOPI, it also believes that the longterm net effect of automation on the economy will be positive. Thus, despite the above uncomplimentary words from a scientifix whose west 381 drives ow modern digital economy, the weeks to in - technologies like 80botic Process Automation.

The benefits of RPA are already well-known: streamlined processes, improved speed, productivity and efficiency, fewer errors, and of course – cost savings. However, what is not well-known are the benefits of RPA Analytics—not only to improve RPA itself, but also to boost the organization's overall business out and analysis.
